**TIP INTRODUCTION**

## TRANSPORTATION IMPROVEMENT PROGRAM

### *PURPOSE*

The Transportation Improvement Program (TIP) is a multi-year program of transportation improvement projects as adopted by state and local government jurisdictions and transportation agencies. The TIP for the Brevard Urban Area is a five-year, financially-feasible multi-modal implementation plan that identifies all transportation projects (including bicycle/pedestrian facilities, transportation enhancements, transit, port and airport projects) to be funded by Title 23 USC and the Federal Transit Act. In addition, the TIP identifies major transportation investments for which FHWA or FTA approval is required whether or not the project is federally funded, as well as major improvement projects funded with local sources. The TIP is financially constrained for each year. The federally funded projects can be implemented using current and projected revenue sources based on FDOT's Tentative Work Program and locally dedicated transportation revenues.

### *PROCESS*

The Transportation Improvement Program is prepared in accordance with requirements found in 23 CFR Parts 450 and 613 and in 339.175 Florida Statutes. The TIP is developed and updated annually under the direction of the Brevard Metropolitan Planning Organization (MPO) in compliance with these federal and state regulations. The Brevard MPO solicits project requests for the upcoming five years from FDOT, transit providers, airport and port agencies and affected local governments. Projects in the MPO's Long Range Transportation Plan are also considered. The Brevard MPO evaluates the project requests according to criteria set out in 23 CFR 450.324 (f), the priority of the project as established by agency and governmental plans and improvement programs, and the availability of implementation funds. The Brevard MPO has also adopted a supplemental evaluation process to determine the nature and scope of potential corridor improvements on arterial roads (Figure 1). As specified in the MPO's Public Participation Program, the MPO annually holds a minimum of two public workshops to solicit project suggestions from the general public. Project priorities are also advertised in the local newspaper prior to the workshops. Numerous other public meetings are annually attended by MPO staff to discuss upcoming projects with the public and to inform the public of transportation planning policy direction of the MPO and local governments. Project improvement priorities are adopted by the MPO following the workshops and review by the Citizens and Technical Advisory Committees.

Following MPO project prioritization in September, the Florida Department of Transportation develops the tentative five-year work program in cooperation with local agencies and transportation providers and following a public hearing. Projects are included in the work program up to the limit of funding availability. The financially-feasible work program is submitted to the MPO for development of the draft TIP. The Citizens and Technical Advisory Committees review the draft TIP and make recommendations to the MPO. The MPO considers and adopts the TIP by mid-May. The tentative FDOT work program, upon which the TIP is based, is considered and adopted by the legislature by April, prior to the adoption of the TIP by the MPO. Projects in the TIP are funded from existing revenue sources, and no new revenue sources are assumed to become available during the five years covered by the TIP.

Projects selected for inclusion in the TIP are consistent with federal requirements and FDOT's Tentative Work Program; are financially feasible for the appropriate funding category; reflect the MPO's priorities; are consistent to the maximum extent feasible with port and aviation master plans, transit development plans, and local government comprehensive plans; and are selected in part based on the public comment received under the MPO's public involvement process adopted pursuant to the requirements in 23 CFR 450.316 (b) and 450.324 (c). The TIP is a management tool for implementing and monitoring the area's Long Range Transportation Plan in accordance with 23 CFR 450.324 (n) (1 and 2).

Certification reviews of the Brevard MPO were conducted by FDOT in 1998 and by FHWA and FTA in 1997. No requirements for corrective actions were issued. The next joint federal agency certification review will occur before September 2000.

*CHANGES IN MAJOR PROJECTS STATUS*

The following documents the implementation or planned significant delay of major projects relative to the prior year's TIP. A "major project" is one of significant scope and size affecting the regionally-significant transportation system, and may involve a state or local road or multi-modal facility.

<u>FACILITY</u>	<u>LOCATION</u>	<u>STATUS CHANGE</u>
Dairy Road	Palm Bay Road to US 192	Construction began
